We reserve the right to make technical changes.

# The drive controllers with **C-line** technology

The particular benefits to users of LTi drive controllers lie in the expert solutions delivered for automation with electric drives and in the high level of control engineering know-how available to handle the control of a wide range of motor types. Always keeping an eye on the physics, looking to make electric drive engineering the core element of machine optimisation and automation.

It is a long-established fact in electric drives that the various control methods can complement each other effectively in handling complex automation tasks. The best method of handling complex movement tasks depends in each case very heavily on the individual requirements of the user - and on the experience and available equipment range of the supplier. Consequently, it is beneficial if all the options can be accessed easily and without changing equipment setup, or even supplier.

## Our focus is on custom drive solutions with our:

- Positioning system 2 A to 210 A
- Inverter systems 0.375 kW to 110 kW
- Servo system
  - for asynchronous and
  - synchronous motors
  - with torque motors
  - with linear motors

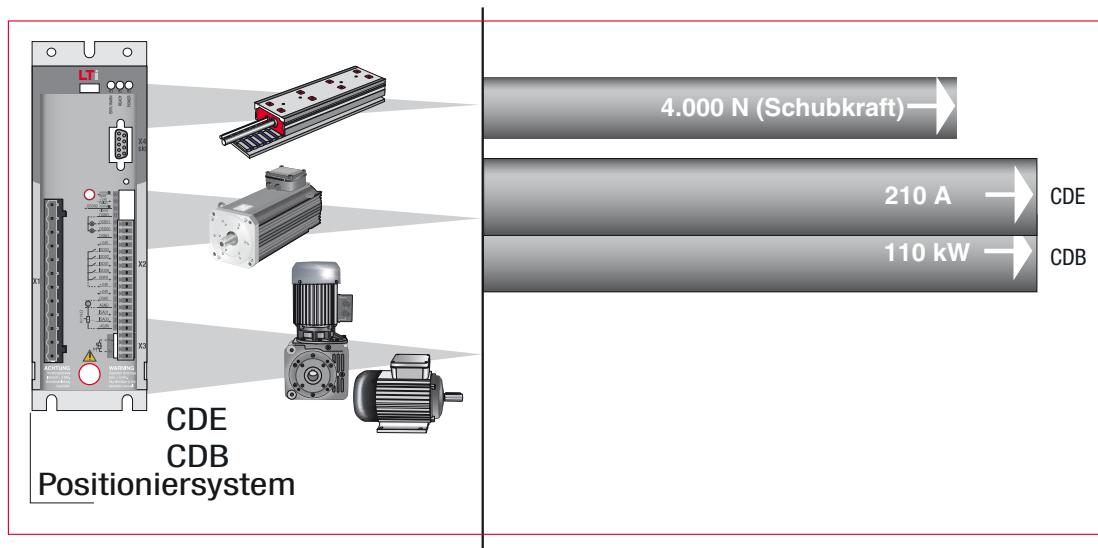

## Servocontrollers and inverters based on same concept

The **C-line** DRIVES are ideal for virtually any task. They include the CDE/CDB positioning controllers with the Voltage Frequency Control (VFC) method and Field Oriented Regulation (FOR) with encoder evaluation. The **c-line** DRIVES servocontrollers include a highly dynamic speed/torque/position control for high-torque motors and linear motors.

All **C-line** DRIVES drive controllers have the same basis, with a wide range of variants for specific solutions. A platform of this kind enables rapid, cost-effective response to new developments.

## Common features of **C-line** DRIVES:

- Design, metal enclosure and cooling method for
  - wall mounting
  - cold plate
  - push-through heat sink
  - liquid cooling
- Excellent EMC performance
- User-friendly operation with the PC tool **DRIVEMANAGER 3**
- Ease of series commissioning with **KEYPAD KP300** and **SMARTCARD**
- Modular networking concept
- Comprehensive range of accessories and complementary components

BG6	CDE/CDB34.070,W <sup>2)</sup>	37	50	72	190 x 345 x 230
BG7	CDE/CDB34.088,W <sup>2)</sup>	45	62	90	280 x 540 x 267.5
BG7	CDE/CDB34.108,W <sup>2)</sup>	55	76	110	280 x 540 x 267.5
BG7a	CDE/CDB34.140,W <sup>2)</sup>	75	99	143	280 x 540 x 321
BG7a	CDE/CDB34.168,W <sup>2)</sup>	90	118	170	280 x 540 x 321
BG6	CDE/CDB34.044,L <sup>2)</sup>	22	31	45	190 x 394.75 x 190 <sup>3)</sup>
BG6	CDE/CDB34.058,L <sup>2)</sup>	30	42	60	190 x 394.75 x 190 <sup>3)</sup>
BG6	CDE/CDB34.070,L <sup>2)</sup>	37	50	72	190 x 394.75 x 190 <sup>3)</sup>
BG7	CDE/CDB34.088,L <sup>2)</sup>	55	76	110	280 x 600 x 201 <sup>3)</sup>
BG7	CDE/CDB34.108,L <sup>2)</sup>	75	99	143	280 x 600 x 201 <sup>3)</sup>
BG7a	CDE/CDB34.140,L <sup>2)</sup>	90	118	170	280 x 600 x 281 <sup>3)</sup>
BG7a	CDE/CDB34.168,L <sup>2)</sup>	110	128	210	280 x 600 x 281 <sup>3)</sup>

1) Mains voltage 3 x 400/460 V -15 % +10 %

2) Mains voltage 3 x 400/480 V -25 % +10 %

3) Without pipe socket for water connection

Rotating field frequency 0 ... 400 Hz

Cooling air temperature 45 °C (40 °C CDB34.003,Cx.x), at power stage switching frequency 4 kHz, 40 °C at power stage switching frequency 8 kHz at power stage switching frequency 12, 16 kHz with derating

# Acceptance tests/Ambient conditions

## CE mark

The positioning controllers<sup>1)</sup> conform to the requirements of the Low Voltage Directive 2006/95/EC and the product standard EN 61800-3 (EMC).

The positioning controllers<sup>1)</sup> therefore conform to the requirements for installation in a machine or plant under the terms of the Machinery Directive 98/37/EC.

The CDE/CDB3000 positioning controllers<sup>1)</sup> are CE marked accordingly. The CE mark on the type plate indicates conformity with the above Directives.

## cUL approbation

The positioning controllers<sup>1)</sup> have been granted UL approbation. The cUL approbation is equivalent to UL and CSA approbation.

1) Also applies to user and communication modules

## EMC acceptance tests

All positioning controllers have a sheet steel housing with an aluminium/zinc finish to enhance interference immunity (to EN 61800-3, environment classes 1 and 2).

All positioning controllers size BG1, 2, 3, 4 and 6 have built-in mains filters to limit mains-borne interference to a permitted level. This ensures compliance with the EMC Directive 2004/108/EC:

**Public low voltage system: Residential areas up to 10 metres motor cable length**

**Industrial low voltage system: Industrial areas up to 25 metres motor cable length**

An extensive range of external mains filters is also available. For more details refer to the "Supplementary components" section.

	Characteristic	Positioning controllers	Accessories (KEYPAD KP300 UM-xxxx and CM-xxxx module)
Climatic conditions	<b>in operation</b> as per EN 61800-2, IEC 60721-3-3 class 3K3	+5 ... 40 °C <sup>2)</sup> at relative humidity of 5 ... 85 % without condensation	0 ... 55 °C <sup>2)</sup> at relative humidity of 5 ... 85 % without condensation
	<b>in storage</b> as per EN 61800-2, IEC 60721-3-1 class 1K3 and 1K4	-25 ... +55 °C <sup>3)</sup> at relative humidity of 5 ... 95 %	
	<b>in transit</b> as per EN 61800-2, IEC 60721-3-2 class 2K3	-25 ... +70 °C <sup>4)</sup> Relative humidity 95 % at max. +40 °C	
Protection	Device	IP20 (terminals IP00)	
	Cooling method	Cold Plate IP20 Push-through heat sink IP54	Convection IP20
Touch protection		BGV 3	
Mounting height		up to 1000 m above MSL, above 1000 m above MSL with power reduction, max. 2000 m above MSL	

### Vibration limit in transit, as per EN 61800-2, IEC 60721-3-2 class 2M1

Frequency	Amplitude	Acceleration
2 < f < 9 Hz	3.5 mm	Not applicable
9 < f < 200 Hz	Not applicable	10 m/s <sup>2</sup>
200 < f < 500 Hz	Not applicable	15 m/s <sup>2</sup>

### Shock limit in transit, as per EN 61800-2, IEC 60721-2-2 class 2M1

Drop height of packed device max. 0.25 m

### Vibration limit of system<sup>5)</sup>, as per EN 61800-2, IEC 60721-3-3 class 3M1

Frequency	Amplitude	Acceleration
2 < f < 9 Hz	0.3 mm	Not applicable
9 < f < 200 Hz	Not applicable	1 m/s <sup>2</sup>

2) The absolute humidity is limited to max. 25 g/m<sup>3</sup>. That means that the maximum values for temperature and relative air humidity stipulated in the table must not occur simultaneously.

3) The absolute humidity is limited to max. 29 g/m<sup>3</sup>. So the maximum values for temperature and relative air humidity stipulated in the table

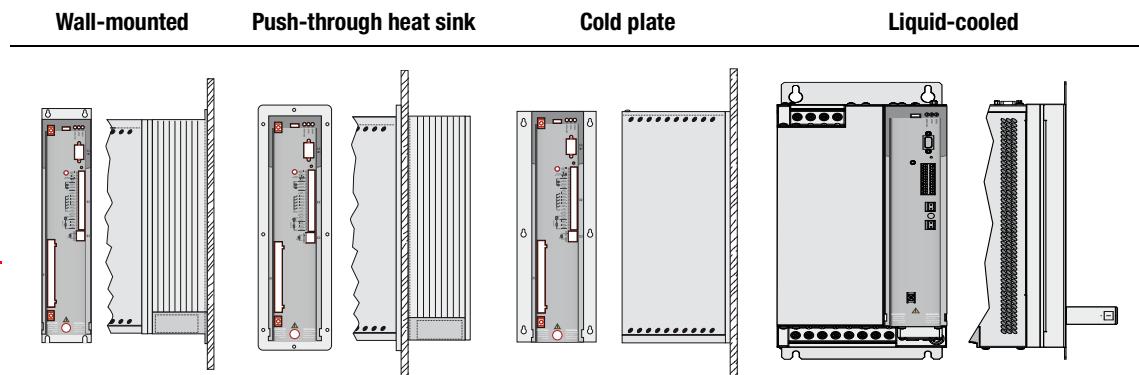

must not occur simultaneously.

4) The absolute humidity is limited to max. 60 g/m<sup>3</sup>. This means, at 70 °C for example, that the humidity may only be max. 40%.

5) The devices are only designed for stationary use.

# Cooling methods

The positioning controllers offer two different mounting and cooling methods (example CDB3000, size 3).

Size	Power	Positioning controllers	Wall mounted	Push-through heat sink	Cold plate	Liquid-cooled
BG1	0.375 kW 0.75 kW	CDE/CDB32.003 CDE/CDB32.004	YES <sup>1)</sup>	NO	YES	NO
BG2	1.5 kW 0.75 kW 1.5 kW	CDE/CDB32.008 CDE/CDB34.003 CDE/CDB34.005	YES	NO	YES	NO
BG2	2.2 kW	CDE/CDB34.006	YES	NO	On request	NO
BG3	3.0 kW 4.0 kW	CDE/CDB34.008 CDE/CDB34.010	YES	YES <sup>2)</sup>	On request	NO
BG4	5.5 kW 7.5 kW	CDE/CDB34.014 CDE/CDB34.017	YES	YES <sup>2)</sup>	On request	NO
BG5	11 kW 15 kW	CDE/CDB34.024 CDE/CDB34.032	YES	YES <sup>2)</sup>	On request	NO
BG6	22 kW 30 kW 37 kW	CDE/CDB34.044 CDE/CDB34.058 CDE/CDB34.070	YES	YES <sup>2)</sup>	YES <sup>2)</sup>	YES
BG7	47 kW 55 kW	CDE/CDB34.088 CDE/CDB34.108	YES	YES <sup>2)</sup>	NO	YES
BG7a	75 kW 90 kW	CDE/CDB34.140 CDE/CDB34.168	YES	YES <sup>2)</sup>	NO	YES

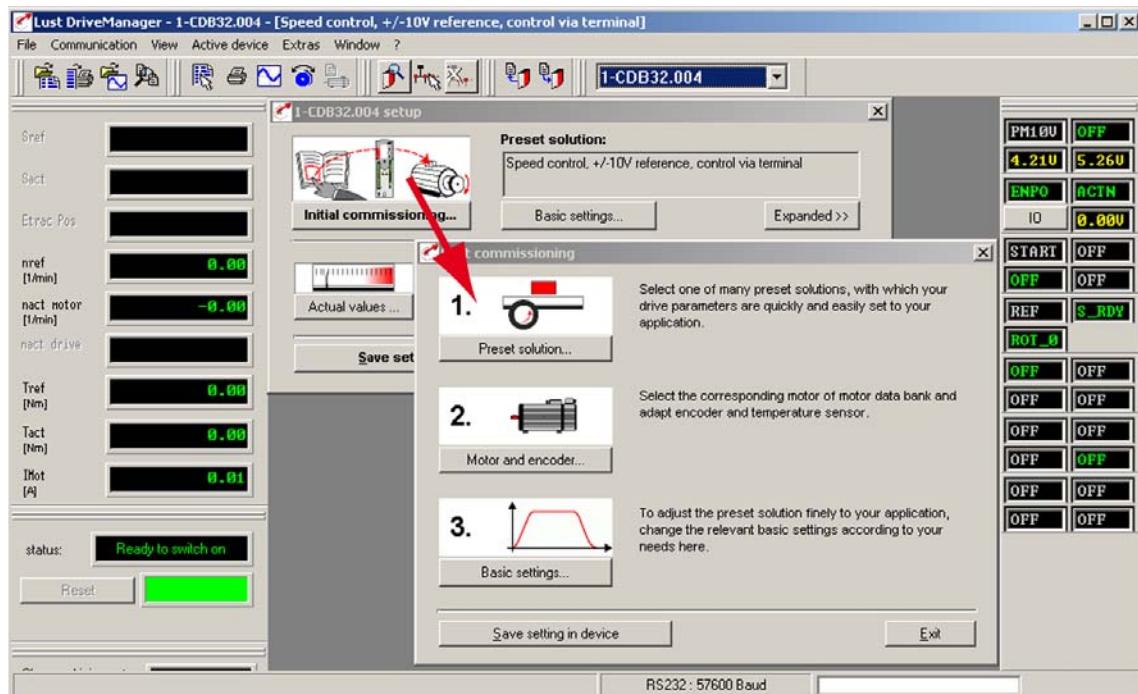

1) Equivalent to cold plate type with accessory heat sink HS3X.xxx

2) Protection IP54

## Initial commissioning made easy

The DRIVEMANAGER 3 PC user interface offers you a user-friendly setup and analysis tool for initial commissioning. Intuitive settings boxes and program sequences ensure rapid commissioning and precise diagnosis of the drive system. Virtually all you need to do is click through. The function screens together

with the application-specific default controller settings only show you the most important parameters. The underlying system complexity is largely concealed.

### 1. Preset solution

Opens a selection box where you simply click on the preset solution you require to select it. Your selection automatically configures the positioning controller. The parameters are preset for the following:

- Control point of the drive controller (e.g. I/O, field bus)
- Setpoint source (e.g. analogue, table or field bus)
- The assignment of the inputs and outputs for signal processing
- Control type (torque, RPM, position)

Using a preset solution makes commissioning of the positioning controller much quicker and easier. By changing individual parameters, the preset solutions can be adapted to the needs of the specific task. These modified preset solutions are stored in the device as customer-specific data sets. This helps you quickly achieve your desired motion solution.

### 2. Motor and encoder setting

Opens a menu which helps you to set the motor and encoder data.

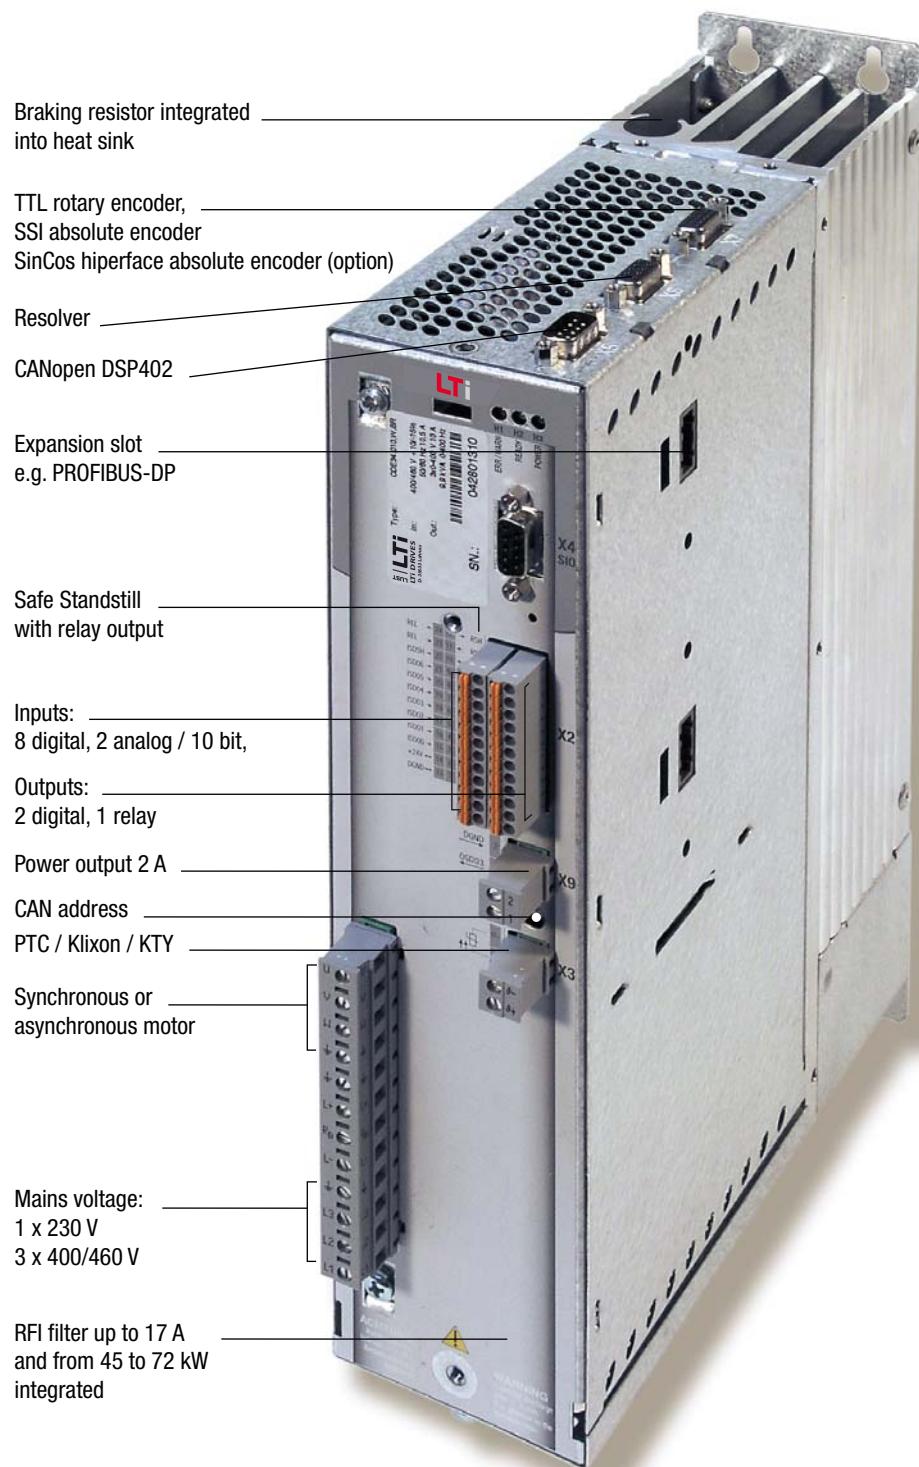

With synchronous or asynchronous motors the motor data and control loops are set using a data record that is stored in the database. With asynchronous motors, this data can also be set by the automatic identification of the connected motor.

### 3. Basic settings

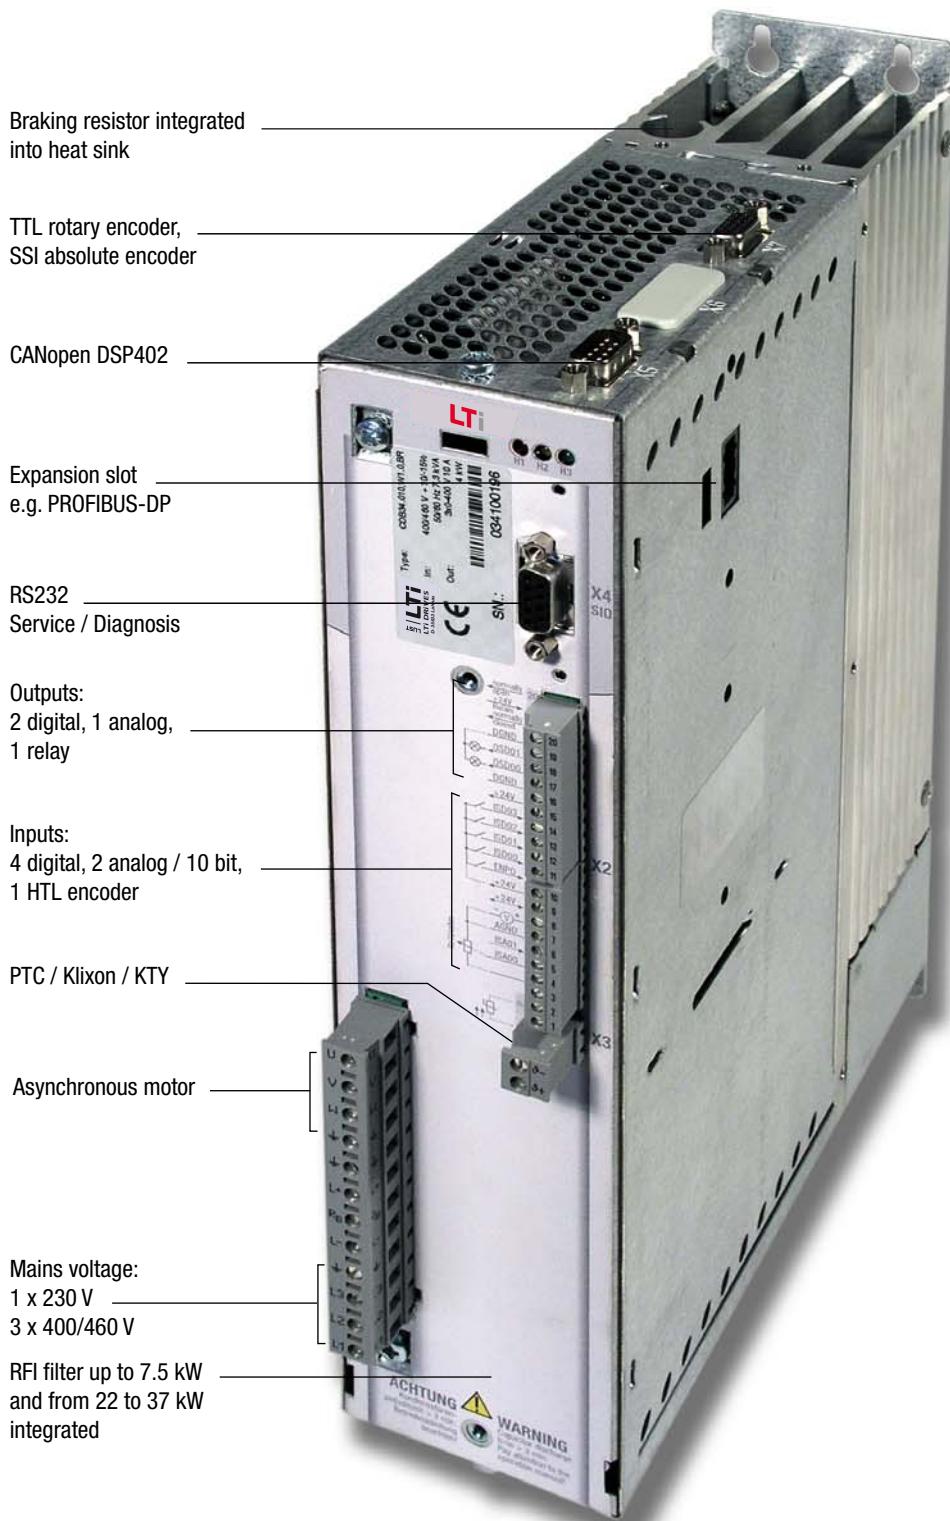

Opens a menu in which you can fine-tune your drive.

All actions are of course documented and visualised. Other parameters such as limit values and ramps can be edited in the dialog box that is specially adapted to the preset solution. All data can then be stored in the connected device on a data carrier or simply on the SMARTCARD SC-XL chip card. This makes the commissioning of other controllers of the same type child's play.

# Specification: CDE3000

## Specification: CDB3000

# ECOPOS — Positioning at its finest

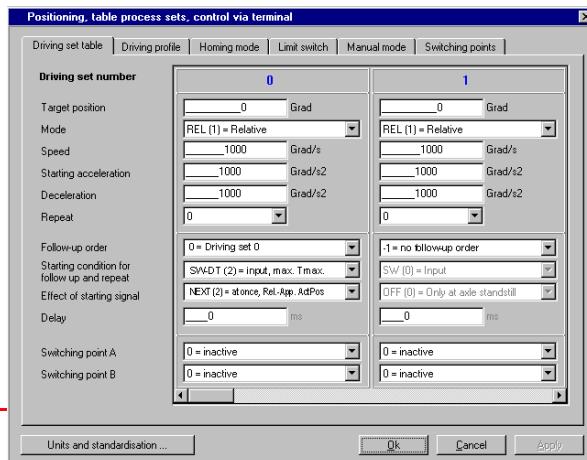

The CDE/CDB3000 drive controllers are optimized for the positioning of electric drives. Alternatively, operation of the drive can also be speed or torque controlled.

The preset solutions provide a wide range of options for setting the motion profile.

## Motion set table with smart follow-up job logic

16 motion sets are stored in the controller in the form of table. These contain the target position, speed, startup and braking acceleration, positioning mode and the conditions for executing a follow-up job. This efficient follow-up job logic ensures the programming of automated event-controlled positioning sequences with functions such as:

- Multiple repetition of the motion set
- Time and/or signal-controlled requesting of the follow-up job
- Different position references of the follow-up job with relative positioning

Four switching points can be defined. Flags are set, reset or inverted at the programmed positions. The switching position reference is variable:

- Absolute position reference
- Relative to the start or end position of the driving set

Two switching points each can be assigned to a motion set. This means that up to 32 different switching points are theoretically possible.

## Field bus motion profile selection with CANopen DSP402 or PROFIBUS

The built-in CANopen interface offers an inexpensive networking option. CANopen guarantees trouble-free interoperability with other network users by supporting CANopen DSP402 compliant triggers and

- Homing Mode,
- Profile Position Mode and
- Profile Velocity Mode.

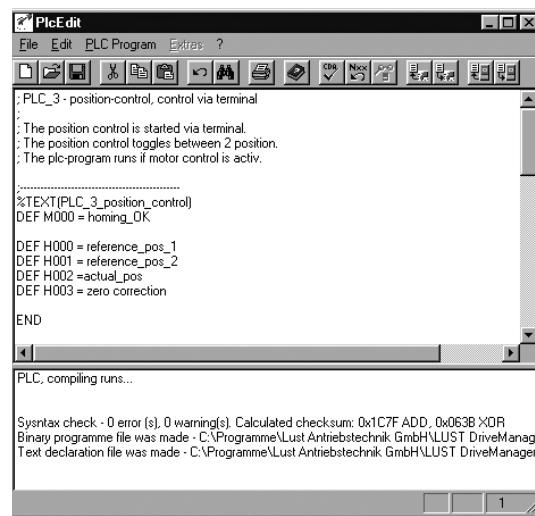

PDO control information is typically processed within 1 ms, making for very short response times.

With **PROFIBUS** networking, specially matched EASYDRIVE profiles are used for communications.

## Motion profile with PLCMOTION for complex motion automation

Should the programmable device functionality not be enough to solve the motion task, then a user-programmable software kernel is available to maximise the application's capability. Programming is done with a simple proprietary command syntax. The syntax is optimised for real time access to all internal device interfaces, process variables and parameters, so creating a wide selection of new control and monitoring options. The most complicated positioning sequences can be programmed with an effective positioning command set.

- Commands for absolute and relative positioning and endless traversing
- Execution of reference traverses
- Rapid hold function
- Changeover to angle-synchronous operation (electronic gearbox) with overlaid relative positions
- Output power stage on/off

The program stored in the controller is built just like a normal parameter, so when the device parameters are transferred the program is sent automatically with the other parameters, thereby significantly simplifying serial commissioning.

## High dynamics and superior control quality

At the heart of the software is the position profile generator that computes the a smooth and time-optimised setpoint trajectory for the position controller from a selected motion set. The fact that the setpoint trajectory is generated online means that a new modified motion set can be transferred and started during ongoing positioning inside just 1ms.

- Short cycle times thanks to a setup time of just 1 ms
- Absolute or relative positioning, endless traversing
- Linear acceleration and braking ramps or with adjustable jolt limiting for motions that are easy on the mechanics
- Jolt-limited changes to the motion job in just 1 ms even during ongoing positioning

The position control loop with its sampling frequency of 4 kHz (250 µs) and an overlaid pilot control structure creates optimum dynamic characteristics and a high control quality.

## Comprehensive basic functions for positioning

Positioning is based on comprehensive basic functions in the hardware or software which can be used independently of a preset solution.

- Application-specific units such as mm, degrees or even user-specific units allow settings in your own language
- Correction-free calculation of uneven gear ratios for rotary tables or indexing conveyors

**Units and standardizations (1)**

Dimension	Exponent	Basic unit	Resulting unit
Position	E0	degree	Grad
Speed	E0		Grad/s
Acceleration			

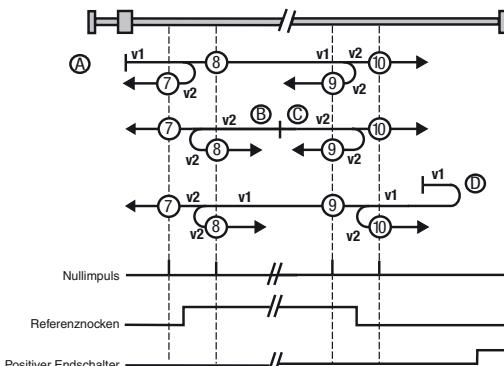

**Units and standardization (2)**

Advance travel constant:  
360 Grad corresponding 1 Revolutions of driving shaft

Gear (if available):  
Revolution of motorshaft 1  
Revolution of driving shaft 1

Buttons: << Back, Ready, Apply, Cancel

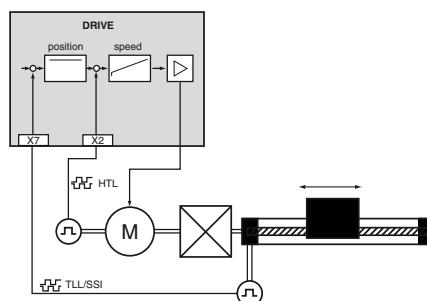

- Different types of reference traverses, including with continuous referencing for slip-prone systems such as conveyor belt

- Rotary table function for the shortest-path positioning of rotary axes
- Limit switch logic
- Jog mode for manually controlling the drive
- Electronic cam controller with 16 cams for controlling connected machine peripherals

Two standard encoder interfaces create many different options for cost optimising or enhancing positioning quality.

- Evaluation of two position measuring systems for pin-point positioning with loose mechanisms

Example with 2 measuring systems with the CDB3000

- Evaluation of absolute encoders for positioning without referencing
- Configuring with just a single encoder on the output shaft when there is a fixed ratio between the input and output shafts
- Encoder connection as master encoder input

# Services

LTi DRIVES offers a wide range of information on the Internet. Whether you are looking for more detailed technical information on our products or on project planning and design, or want to contact your nearest LUST representative - just visit our website at

<http://drives.lt-i.com>

## Software update service

As part of our product maintenance function we are continuously improving the quality of the drive system. Our software update service provides you with information on new releases and enhancements of the various firmware versions.

This information, together with the latest firmware, is available for downloading on our Info Server.

## Design-in

Professional project management that keeps you to within deadlines and budgets is an important element of our joint success. The sooner you get to market with your new solution the better. That's why we can support you in

- analysing requirements
- planning the drive design
- creating the functional specification
- total cost analysis
- project management

## Logistics

To make ordering a routine exercise and reduce or even eliminate unnecessary formalities, the entire process is co-ordinated, from planning through ordering to spare parts supplies.

## After-sales

You can call on our Service and Support wherever and whenever you need it. With our flexibility, fast response times, superior technical know-how and extensive user experience, we can offer a wide range of services, including

- On-site commissioning
- Advice and training
- Repairs/service concept

### Our service concept for your success

We tailor our service to your needs!

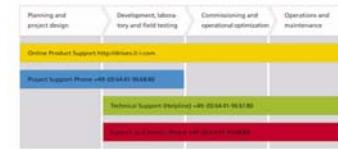

LTi Support and Service will provide you with all the know-how you need throughout the lifecycle of your drive and automation solution. Our team of expert specialists will be at your side to help with every stage: from planning and development through commissioning, to routine maintenance – we are committed to delivering personalized service in all respects.

#### Expert support in every phase

Our experts provide support and advice specifically to the individual phases, so as to ensure the right assistance is provided precisely where and when it is needed:

The continuous training and development which our specialists undergo guarantees that your projects will be handled smoothly and competently, and the right solutions will be found in every phase.

#### Four-phase lifecycle model

## Helpline

Our Helpline can assist you with:

- telephone commissioning of standard products and systems
- evaluating error and diagnostic displays
- locating and dealing with repeatable faults, and
- software updates.

You can reach us:

Mon.-Fri.: 8 a.m. - 5 p.m. Tel. +49 6441/966-180

Fax: +49 6441/966-177

<b>Mains voltage</b>	230 V -20% +15%			3 x 400 V (-15%) ... 3 x 460 V (+10%)			3 x 400 V (-25%) ... 3 x 480 V (+10%)		

<sup>1)</sup> Only in liquid-cooled variant

## Current capacity of positioning controllers

The maximum permissible inverter output current and the peak current are dependent on the mains voltage, the motor cable length, the power stage switching frequency and the ambient temperature. If service conditions change, then the maximum permissible current capacity of the positioning controllers also changes. Refer to the following charts and tables for details of which current load is permissible under which changed service conditions.

### (1) Continuous

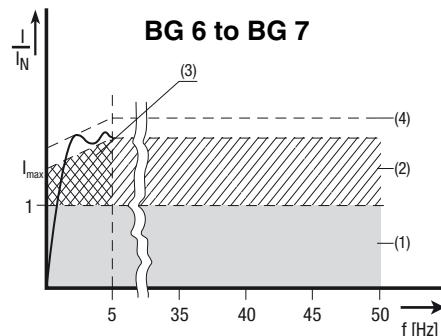

### (2) Intermittent\* > 5 Hz rotating field frequency

### (3) Intermittent 0 to 5 Hz rotating field frequency

### (4) Pulse mode

**Positioning controllers 45 to 210 A (22 to 110 kW)**  
 $I/I_N = 2.1$  at 4/8/12/16 kHz

$$I_{eff} = \sqrt{\frac{1}{T} \cdot \sum_{i=1}^n I_i^2 \cdot t_i}$$

## Positioning controllers for 230 V systems

Servocontrollers	Switching frequency of power stage [kHz]	Ambient temperature [°C]	Rated current at 230 V [A <sub>eff</sub> ]	Peak current [A <sub>eff</sub> ] <sup>3)</sup>		
				for intermittent operation 0 to 5 Hz	for intermittent operation > 5 Hz	for time <sup>4)</sup> [s]

## KEYPAD

## Series

## Variant

---

**Order code**

## **Order designation Summary**

KP300

KEYPAD with graphical display ( 128 x 64 pixels) for parameter setting, actual value display and serial commissioning of positioning controllers. Graphical display including device status and parameter texts. Language: German or English (configurable). The KEYPAD supports the SMARTCARD "SC-XL".

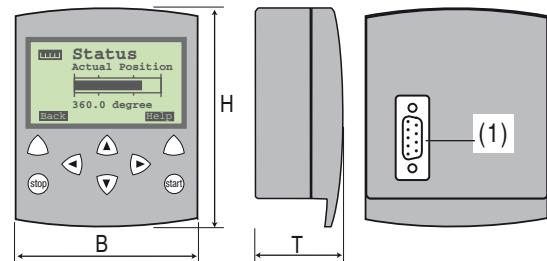

### KP300 mechanism

Dimensions (see illustration) 70 x 84 x 37 mm (BxHxT)

Weight 120 g

Connection (RS232)

Standard (1) Can be plugged directly into drive unit

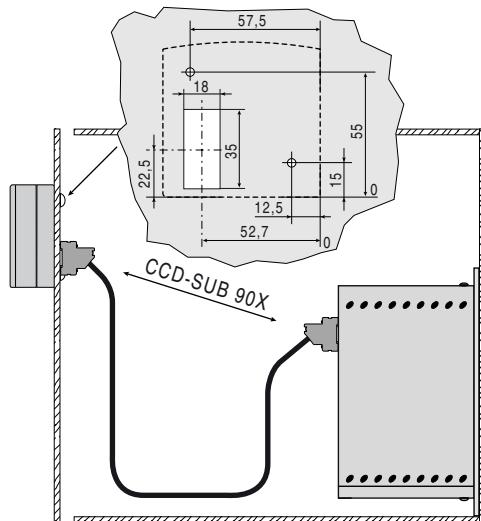

---

#### Cable connection

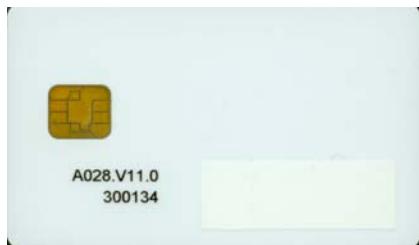

#### **Installation in switch cabinet door**

**Connection between the KP300 and positioning controller** Mounting in the cabinet door requires two holes for the fixing screws and a break-through for the connector.

positioning controller	connector.
CDE/CDB3000 is made using cable	Please use only self-tapping screws for thermoplastics (e.g. EJOT PT screw, type K30 x 8 WN1412). Max. cable length 3 m.
CCD-SUB90X	

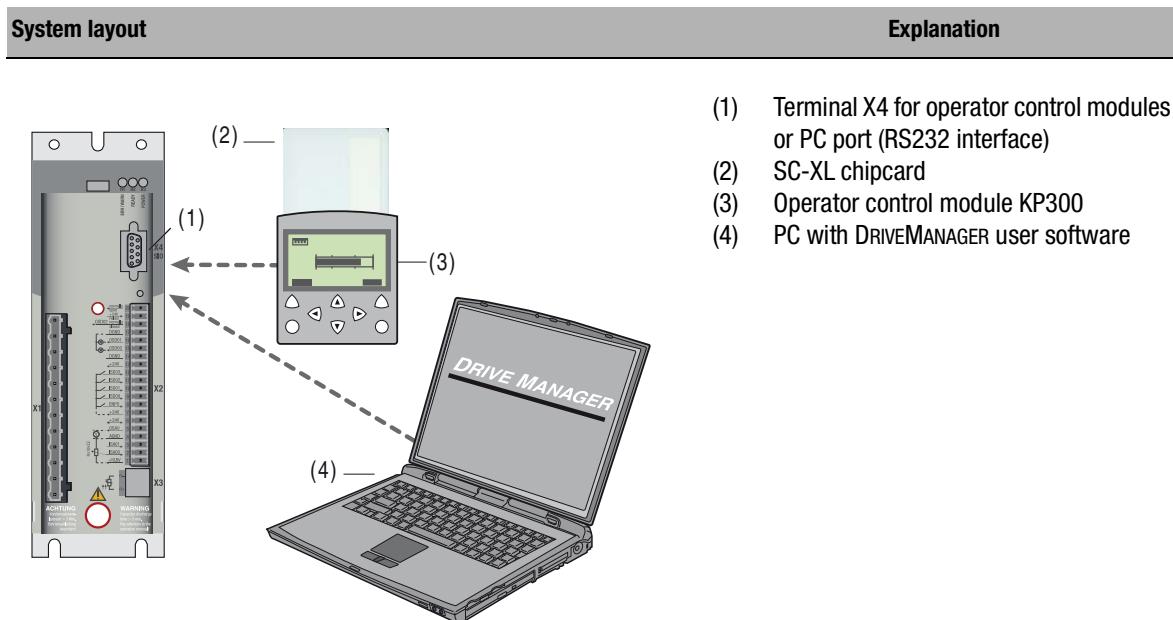

## SMARTCARD memory card

SC - XX  
SMARTCARD  
Memory version

Order designation	Summary
SC-XL	The data set of the positioning controller can be stored and easily transferred to other positioning controllers. Suitable for KP300.

Tech. data	DRIVEMANAGER 3.x
<b>Software features</b>	The "DRIVEMANAGER" PC user software provides the following functions: <ul style="list-style-type: none"> <li>- Setup screen based highly user-friendly handling</li> <li>- Status display to monitor the operation-specific actual and reference values</li> <li>- Direct control of the inverter by PC</li> <li>- User-friendly four-channel digital scope for real-time recording of actual values such as current curve or v/t diagram</li> <li>- Comparison function for problem solving, data administration and print functions</li> </ul>
<b>Hardware and software requirements</b>	<ul style="list-style-type: none"> <li>- Microsoft Windows® 95/98/ME or Windows® NT, 2000, XP</li> <li>- At least 32 MB RAM (64 MB recommended)</li> <li>- CD-ROM drive (recommended min. 24x read)</li> </ul>
<b>Supply package</b>	<ul style="list-style-type: none"> <li>- 1 CD-ROM for installation of the DRIVEMANAGER user software</li> <li>- All user manuals and software descriptions for the various device series as PDF documents</li> </ul>
<b>Languages</b>	- On installation you can choose between German or English.

Order designation	Licences
<b>DRIVEMANAGER 3.x TEST</b>	- Contains the full functionality and is intended for test and demo purposes. The runtime is limited to 180 days from date of installation.
<b>DRIVEMANAGER 3.x</b>	- Contains the full functionality for parameter-setting, control and monitoring. The runtime is unlimited. The software licence permits simultaneous use on any number of workstations.

## Connecting cable

CCD-SUB 90x

**CC D-SUB 9 0x**

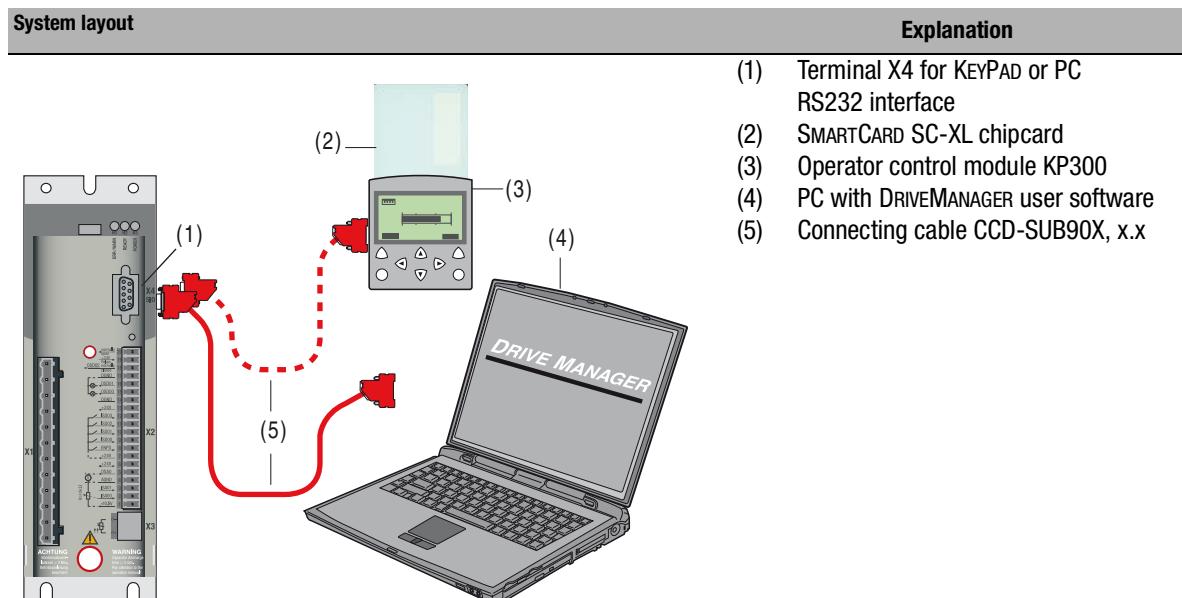

**Connecting Cable**

**Cable type D-SUB**

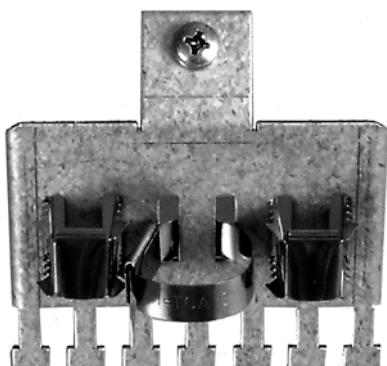

**Cable length in metres**

Connecting cable

Order designation	Technical data
CCD-SUB 901	Cable for link between servocontroller and Keypad or drive controller and PC with DRIVEMANAGER, length 1 m
CCD-SUB 902	Cable for link between servocontroller and Keypad or drive controller and PC with DRIVEMANAGER, length 2 m
CCD-SUB 903	Cable for link between servocontroller and Keypad or drive controller and PC with DRIVEMANAGER, length 3 m

Product DVD

Note: Every CDE/CDB3000 unit shipped is accompanied by a product DVD.

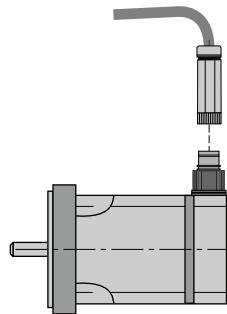

The LTi Drives product DVD includes all the documents available for the CDE/CDB3000 series (see table). You will also find on it documentation relating to other product series, such as ServoOne and the catalogue for motor series LSH and LST. The product DVD incorporates additional information in sections headed "Company", "Product", "Support & Service" and "PR/News".

User information	Use/contents	Language
Operation Manual CDE/CDB3000	Presents the mechanical and electrical installation of the CDE/CDB3000 positioning controller. Guide to quick and easy initial commissioning.	German/English/French/Italian
Application Manual CDE/CDB3000	Describes adaptation of the drive system to the application (software-based).	German English
Prospekt CDE/CDB3000	Die Positionierkünstler in der Economy Class	German
Brochure CDE/CDB3000	The Positioning Experts in the Economy Class	English
Engineering Guide c-line DRIVES	This Guide is intended for users looking for background information relating to the engineering of drive system projects.	German English
Benutzerhandbuch	CANopen-Kommunikation	German
User Manual	CANopen Communication	English

	<b>LSx motors - for functional extra-low voltage 24/48 V</b>	LST-037 LSH-050 LSH-074	6 - 4

## The LSH motor - the power pack

Using a completely new winding technology known as concentrated winding, the new LSH generation of motors improves power density by between 30 % and 70 % compared with conventional technologies.

For the user this means up to 100 % improvement in dynamics and significantly reduced space requirements combined with smooth running.

1) DC link voltage 320 V

2) DC link voltage 320 V/560 V

3) DC link voltage 560 V

**Note:** For detailed electrical data and accessories, such as system cables, refer to the Servomotors order catalogue (article no.: 0814.05B.X-XX).

## The LST motor - the versatile one

Featuring conventional winding technology, the LST motor combines all the advantages of a 6-pole synchronous servomotor.

- Well suited to speeds up to 9000 rpm. Special windings are possible on request.
- High overload capacity even at standstill based on efficient heat distribution in the stator packet.
- Increased rotor moment of inertia for torque adaptation.

## Overview of technical data

Technical data	Standstill torque	Rated torque	Rated current at 560	Rated current at 320	Rated speed

**Note:** For detailed electrical data and accessories, such as system cables, refer to the Servomotors order catalogue (article no.: 0814.05B.X-XX).

## LSx motors - for functional extra-low voltage

The servomotors of the LSH and LST series are also available with motor windings for functional extra-low voltage to IEC 364 (VDE0100, part 410). Together with the servocontroller CDF3000, they offer the optimum combination for this voltage range.

### Overview of technical data

Technical data	Standstill torque	Rated torque	Rated current at 24 V	Rated current at 48 V	Rated speed $n_N$ [rpm]	
	Motor	$M_0$ [Nm]	$M_N$ [Nm]	$I_N$ [A]	$I_N$ [A]	at 24 V
LST-037-1-80-24	0.10	0.09	5.4	5.4		8000
LST-037-2-60-24	0.20	0.18	6.9	6.9		6000
LSH-050-1-30-48	0.25	0.24	3.1	3.1	1000	3000
LSH-050-2-30-48	0.50	0.47	5.5	5.4	1000	3000
LSH-050-3-30-48	0.70	0.67	7.1	6.9	1000	3000
LSH-074-1-15-24	0.80	0.75	8.3	8.3		1500

**Note:** For detailed electrical data and accessories, such as system cables, refer to the Servomotors order catalogue (article no.: 0814.05B.x-xx).
